

Our daughter was very fortunate to have Ms. Dani DiPietro as her 6th Grade home room and Science teacher. Ms. D is definitely one of those rare teachers with the ability to make a lasting impact on their pupils and is no doubt a teacher our daughter will never forget. Ms. D opened our daughter's eyes to the fascinating wonders of Science - a subject she was previously rather ambivalent about, but now counts as one of her favorites. Ms. D did not only get her attention, she ignited her curiosity and imagination through engaging, hands-on lessons and inspiring perspective, enriched by her impressive experience inside and outside the classroom. Ms. D is not simply a master of the content she teaches but clearly has genuine passion for her subject that takes her lessons to a whole different level! Our daughter says that Ms. D makes learning fun - she is interesting, inclusive and has a wonderful sense of humor and ability to genuinely connect with and engage her students. We are so grateful to her for stretching our daughter's mind and expanding her horizons.
